# TAYA DAILEY

Troy, MI | dailey.t@outlook.com | linkedin.com/in/tayadailey | tdailey1121.github.io/taya-portfolio

## PROFESSIONAL SUMMARY

Analytics professional with 4+ years of experience leveraging data analytics and business intelligence tools to drive strategic insight and support informed decision-making within the health insurance and healthcare industry. Experienced building executive-level Power BI dashboards, SQL-based datasets, and semantic models, with working proficiency in Python for data analysis. Skilled in stakeholder requirements gathering, KPI development, data storytelling, and cross-functional collaboration, with a consistent record of translating ambiguous business goals into clear, actionable reporting solutions.

## EDUCATION

**Oakland University — Rochester Hills, MI**

Master of Science in Business Analytics — *Expected May 2027*

Bachelor of Science in Management Information Systems — *December 2022*

## PROFESSIONAL EXPERIENCE

**Henry Ford Health (Health Alliance Plan) — Troy, MI** — *January 2026 – Present*

*Support Specialist, Revenue Cycle Operations*

- Enter and maintain Medical Record Request (MRR) and DRG audit requests in Midas, performing data validation to ensure accurate and complete request information.
- Review third-party payer and vendor correspondence through a centralized Payor Audit mailbox, identifying request type, vendor, key dates, and resolution timeframes — building first-hand knowledge of payer and provider experience touchpoints across the health plan.
- Categorize audit correspondence using standardized request and resolution codes, including DRG, CPT, upheld decisions, and Medical Record Requests.
- Route audit requests to appropriate facilities based on request details and established Payor Audit workflows, supporting timely processing and resolution.
- Maintain accurate audit documentation and request data, applying strong attention to detail and data quality throughout the request entry process.

**Blue Cross Blue Shield of Michigan — Detroit, MI** — *July 2023 – August 2025*

*Business Intelligence & Strategy Analyst*

- Designed and delivered executive-level Power BI dashboards translating operational performance, member behavior, and business trends into clear, actionable insight for stakeholders and leadership.
- Built SQL-based datasets and Power BI semantic models to support routine and ad hoc analysis of member and business trends across multiple data sources.
- Partnered with business owners and cross-functional teams to determine information needs, define research questions, and scope reporting and analysis projects from ambiguous business goals to clear deliverables.
- Documented data sources, reporting logic, and KPI definitions to support reporting quality, governance, and cross-team knowledge sharing.
- Designed and administered feedback surveys using Microsoft Forms to capture trainee sentiment on internal training programs, synthesizing qualitative responses into actionable recommendations for program improvement.
- Developed end-user training resources and communicated analytical findings to business stakeholders, translating complex data into business-focused recommendations and next steps.

## TECHNICAL PROJECTS

**US Healthcare Performance & Cost Analysis** — *Spring 2026*

*Personal Project*

- Analyzed healthcare costs, patient utilization, diagnostic trends, and operational performance across U.S. healthcare data, translating findings into executive-level KPI scorecards and visualizations.
- Applied data storytelling techniques to synthesize complex healthcare data into clear business insights and recommendations.

**Detroit Shock Fan Lifecycle & CRM Intelligence Dashboard** — *2025*

*Personal Project*

- Built a fan-level CRM intelligence dashboard analyzing engagement, ticketing, and merchandise behavior to identify customer lifecycle stages, behavioral segments, and value tiers.

- Developed DAX logic for engagement scoring, recency, lifecycle staging, and rule-based next-best-action recommendations to support retention and conversion strategy.
- Identified data quality issues affecting customer activity tracking and adjusted modeling assumptions accordingly, then translated findings into audience-specific marketing recommendations.
